JUL 20 1992
CEDAR CITY, UTAH

Ladies/Gentlemen:

Please be advised that we shall be removing ore from our Desert #28 placer claim for testing. This claim is located in the N. E. 1/4 portion of the S. E. 1/4 section of section 15, Township 42 South, Range 11, G&SRM, Utah. The BLM assigned number is UMC 350286.

The claim starts 2,640 feet south and 3,960 feet east of the permanent monument, which is the section corner that marks section 15 from sections 9, 10 and 16 and the claim runs 1,320 feet in an eastward direction from there, then 660 feet in a southward direction, then 1,320 feet in a westward direction and then 660 feet in a northward direction.

The ore shall be removed from the east section of this claim and shall disturb five acres or less. The area of disturbance shall encompass 330' on the north line, in a west direction of the claim from the unimproved road that runs through the claim, then 660' south to the south end line of the claim to a point that is 330' west of the unimproved road that runs through the property and will follow north the unimproved road that runs through the claim, a distance of 660'.

Operations will commence approximately August 30, 1992.

No new roads will be created, as the area abutts a present unimproved road.

Reclamation of the area disturbed will be completed to the standards described in section 3809.1.

Reasonable measures shall be taken to prevent unnecessary or undue degradation to the lands.

Yours truly,

A handwritten signature in dark ink, appearing to read "J. Doyle". The signature is fluid and cursive, with a long, sweeping horizontal stroke at the end.

President
Mr. Jack Doyle

Larry Gore - DRA Geologist

Jack Doyle - himself - operator.

I called Doyle to confirm what work he was proposing.

He said they had decided not to work on the metalliferous #27 claim and would confine the operations to the Desert #28 claim per the July 27 NOI

They were proposing a placer operation in which ~~the~~ dirt (loose material) would be excavated down to the sandstone ledge - depth ^{may} ~~could~~ vary from 2 to 20 feet.

A front end loader and 8-10 yd dump trucks would be used. We discussed concerns of heavy truck traffic on a road publicized for tourist use.
